TECHNICAL/WORK EXPERIENCE

Google   New York, NY
Computer Science Summer Institute   July 2019 - Aug 2019

- Selected as 1 of 30 high achieving students for a 3 week intensive software development program at Google NYC.
- Designed, implemented and presented a food sustainability webapp called Pass The Plate in three days. Technologies used include HTML/CSS, Javascript, SQL and Jijna2.

Ascent Apartments   San Jose, CA
Leasing Assistant   June 2020 - Aug 2020

- Developed "Bloom", a pool reservation webapp designed to facilitate online bookings during the COVID pandemic.
- Provided all around community assistance through handling phone lines, resident concerns, and managing the pool according to COVID guidelines.

Golden Hack   Waterloo, ON
Hackathon Participant   Oct 2020 - Oct 2020

- Designed, implemented and presented a social media clothing web-application called Yourdrobe designed to allow users to see, post and save different outfit styles they have interest in remembering or buying.
- Sole full-stack developer in a team of 4 business oriented students. Technologies used include HTML/CSS and Django.

Hack the Valley   Toronto, ON
Hackathon Participant   Feb 2020 - Feb 2020

- Designed and developed Subletr, a web scraping webapp to find sublets listed on different websites
- Led a 4-person team of brand new hackers by working as the full-stack developer of the webapp. Technologies used include HTML/CSS, React JS, Selenium and JSON.

TECHNICAL SKILLS AND COURSEWORK

Programming Languages:	Python, Java, HTML/CSS, JavaScript, Flash, VBA
Technologies and Frameworks:	Django, React Js, Windows/UNIX Cmd, Git
Coursework:	Intro to CS, Data Structures I, Calculus, Linear-Algebra, Proofs

PROJECTS

Bloom *Django, HTML/CSS*   bloomreservations.com
Bloom is a robust and visually attractive pool reservation web app complete with a staff CRM platform and user dashboard. It was self-initiated project born out of the need for a better solution for staff and residents alike.

YourDrobe *Django, HTML/CSS*   https://github.com/ObiTracks/Yourdrobe
Yourdrobe is a social media webapp that allows users to find, post and save clothing styles for personal inspiration - anything from basic home lounge wear, to specific fashion styles. Think TikTok but for clothes.

Personal Portfolio *React JS, HMTL/CSS, Git*   moihej.com
My personal website is my first project done using React JS. It contains projects I've worked on and information about me. Implements a Reddit API to display my reddit posts.

AWARDS

HP Inc. Business Competition Finalist   HP Inc. Canada
Developed the concept and business plan for a compact wireless printer for HP to add to its product line-up to attract younger demographics.   January 2019
